

## **Regional Sales Manager: Automation Systems Western Canada**

Electromate is a leading Canadian Distributor of Automation & Motion Control components & systems. We provide the industry's most comprehensive selection of motion controllers, servo/stepper components, positioning and bearing systems for factory automation.

Thanks to the continued success of our satisfied customers, our firm is expanding our sales department. Challenge your expertise in the field of Outside Sales by providing engineering sizing/selection and sales of automation components and systems.

The successful candidate should have a degree in mechanical or electrical engineering or equivalent (CET acceptable), a minimum of 4-6 years experience with servo/stepper based factory automation equipment, and a familiarity with OEM accounts in Western Canada.

You will work with our Inside Sales and Application Engineering team to penetrate new strategic account prospects in British Columbia and Alberta, as well as maintaining our excellent relations with our existing customer base.

This progressive position offers a competitive salary including a performance bonus program, car allowance and a fully subsidized Group Benefits Plan.
