

Tailored Solutions for your Mechatronic Subsystem

Powered by

ELECTROMATE
Robotic and Mechatronic Solutions

Electromate boasts a comprehensive product range of automation components and a wealth of expertise in the field of mechatronic technology.

In addition to our core offerings, Electromate has a track record of designing complete mechatronic subsystems that are tailored to the unique needs of our customers across diverse applications.

We collaborate closely with our customers to develop the ideal solution for your specific product requirements.

By engaging in the initial stages of a project, Electromate leverages its expertise to assist in the customer's development process, ensuring the best possible solution is achieved in partnership.

Examples of our Engineered Mechatronic Subsystems:

- Medication Delivery System
- Subway Door Drive systems
- AMRs (autonomous mobile robot drive systems)
- UAVs (unmanned aerial vehicle drive systems)
- AGVs (automated guided vehicle drive systems)
- Power Tools
- Satellite Communications
