LINEAR SOLUTIONS MADE EASY
RSX Extreme Force, Hydraulic Class Electric Actuator

WHAT IS THE RSX?
RSX actuators are an ideal choice for replacing hydraulic cylinders. These high force electric actuators are available for forces up to 50,000 lbf (222.4 kN). Designed for 100% duty cycle, rugged service and long life. The RSX utilizes planetary roller screws for long lasting consistent performance. Additionally, the RSX uses Tolomatic’s popular Your Motor Here program which allows RSX to easily mount many servo motor and gearboxes on the market.

RSX Extreme Force, Hydraulic Class Electric Actuator

Applications

Volumetric pumps
Injection molding

Motion simulators

Pressing
Punching
Piercing

Cut-Off & Other Timber Applications

Other Applications:
- Active Security Barrier
- Assembly machinery
- Automatic tool changers
- Automotive
- Clamping
- Converting
- Cycle testing
- Fillers
- Formers
- Hydraulic replacement
- Machine tools
- Open / close doors
- Parts clamping
- Piercing
- Precision grinders
- Product test simulations
- Pressing
- Punching
- Riveting / fastening / joining
- Sawmilling equipment
- Stamping
- Tension control
- Test stands
- Tube bending
- Wave generation
- Web guidance
- Welding
- Wire winding
- and many more

The RSX series high force electric actuators with planetary roller screws are designed for rugged service, long life and are an ideal choice for replacing hydraulic cylinders.
**HIGH PRESSURE TIMING BELT**

- Carbon fiber tensile reinforced synchronous belt to ensure smooth transmission of high torques in a compact design.

**HIGH FORCE ANGULAR CONTACT BEARINGS**

- Four ball bearings to support high axial loads & forces for long life

**MOTOR ORIENTATION**

**YOU CAN CHOOSE:**
- Inline option directly couples the driving shaft
- Reverse-parallel option minimizes the overall length and offers a belt reduction drive with a 1:1 or 2:1 ratio

**ROLLERS SCREW TECHNOLOGY**

- Precision ground planetary roller screws provide the highest force and life ratings available

**BREATHER/PURGE PORTS**

- Standard feature on RSX actuators
- Located on the opposite side of the actuator
- Use as Breather Port: allows air flow into the interior of the actuator. Prevents additional load on the motor caused by air buildup due to fast cycling of the RSX. Use as Purge Port: positive pressure with air lines and filters ensure contaminants do not enter the interior of the actuator.

**INTERNAL ANTI-ROTATE**

- Composite bearings prevent rotation of the thrust tube

**MOUNTING OPTIONS**

- Front Flange
- Extended Tie Rods
- Trunnion
- Mounting Plates
- Rear Clevis

**ROD END OPTIONS**

- Rod Clevis
- Threaded Rod (standard)
- Extended Rod

**SENSOR OPTIONS**

- Solid state NPN, PNP or reed
- Tie Rod Clip

---

**BREATHER/PURGE PORTS**

- Standard feature on RSX actuators
- Located on the opposite side of the actuator
- Use as Breather Port: allows air flow into the interior of the actuator. Prevents additional load on the motor caused by air buildup due to fast cycling of the RSX. Use as Purge Port: positive pressure with air lines and filters ensure contaminants do not enter the interior of the actuator.

**INTERNAL ANTI-ROTATE**

- Composite bearings prevent rotation of the thrust tube

**MOTOR ORIENTATION**

**INTERNAL ANTI-ROTATE**

- Composite bearings prevent rotation of the thrust tube
The RSX096P press actuator expands the extend force capability to 40,000 lbf (178 kN) making it well suited for applications such as pressing, riveting, clinching and many others. The RSX096P press model has all the features of the standard RSX on pages 4 & 5 plus oversized tie rods, a bearing system optimized for high force extend, and a high strength steel front flange.
FOOD GRADE RSX

Endurance Technology features are designed for maximum durability to provide extended service life.

The food grade RSX has all the features of the RSX shown on the previous pages plus additional features that are suited to challenging environments: 316 Stainless steel thrust rod, rod end, tie rods, fasteners; food grade white paint; IP67 rating; and food grade grease. The food grade RSX is a great option for the food & beverage processing environment. Contact Tolomatic for lead time and application review.

RSX Extreme Force, Hydraulic Class Electric Actuator

ROLLER SCREW LIFE ESTIMATE PERFORMANCE

RSX Standard Actuators Expected Life:

The underlying formula that defines this value is:

\[ L_{10} = \left( \frac{C}{P_e} \right)^{3/4} \times L \]

\( L_{10} \) Travel life in millions of units (in or mm),
where:
- \( C \) = Dynamic load rating (lbf) or (N)
- \( P_e \) = Equivalent load (lbf) or (N)
- \( L \) = Screw lead (in/rev) (mm/rev)

Use the "Equivalent Load" calculation below, when the load is not constant throughout the entire stroke. In cases where there is only minor variation in loading, use greatest load for life calculations.

\[ P_e = \sqrt[3]{L_1(P_1)^3 + L_2(P_2)^3 + L_3(P_3)^3 + \ldots + L_n(P_n)^3} \]

Where:
- \( P_e \) = Equivalent load (lbf) or (N)
- \( P_n \) = Each increment at different load (lbf) or (N)
- \( L \) = Total distance traveled per cycle (extend + retract stroke)
- \( L_n \) = Each increment of stroke at different load (in) or (mm)

RSX Press Application Expected Life:

An alternate method for estimating life is used for applications where the force is applied repeatedly over a short area of the stroke. If the distance at max force occurs within one revolution of the screw, contact Tolomatic for assistance determining a life estimate.

Example:
- Travel required is 200mm to load parts and apply the press.
- Contact is made at 190mm extended and continues to 200mm position. Total travel under load is 10mm.
- 10mm is less than the screw lead (distance traveled in one revolution).
- Contact Tolomatic for assistance determining the estimated life.

RE-LUBRICATION RECOMMENDATION:

Lubrication requirements for electric actuators depend on the motion cycle (velocity, force, duty cycle), type of application, ambient temperature, environmental surrounding and various other factors.

Tolomatic recommends to re-lubricate the actuator at least once per year or every 1,000,000 cycles, whichever comes first, to maximize service life. For more demanding applications such as pressing, high frequency or other highly stressed applications, the re-lubrication interval for these actuators will vary and will need to be more frequent. In these demanding applications, it is recommended to execute at least 5 full stroke moves every 5,000 cycles of operation (or more frequent if possible) to re-distribute the grease within the actuator.

Re-lubricate with Tolomatic Grease into the grease port located on the side of the actuator.

A = Customer Specified Length
RSX Extreme Force, Hydraulic Class Electric Actuator

MOUNTING PLATE OPTION (MP2) DIMENSIONS

TRUNNION OPTION (TRR) DIMENSIONS

OPTIONAL ROD EXTENSION (XR)

The thrust rod length can be extended by specifying the rod extension option. This does not increase the working stroke, only the length of the thrust rod.

*NOTE: Please consult Tolomatic if your application requires rod extension length greater than 100 mm (3.9 in).*
RSX Extreme Force, Hydraulic Class Electric Actuator

**SWITCHES**

RSX actuators offer a wide range of sensing choices. There are 12 switch choices: reed, solid state PNP (sourcing) or solid state NPN (sinking); in normally open or normally closed; with flying leads or quick-disconnect.

Commonly used for end-of-stroke positioning, these switches allow installation anywhere along the entire actuator length. The internal magnet is a standard feature. Switches can be installed in the field at any time.

Switches are used to send digital signals to PLC (programmable logic controller), TTL, CMOS circuit or other controller device. Switches contain reverse polarity protection. Solid state QD cables are shielded; shield should be terminated at flying lead end.

All switches are CE rated and are RoHS compliant. Switches feature bright red or yellow LED signal indicators; solid state switches also have green LED power indicators.

*QD = Quick-disconnect Enclosure classification IEC 529 IP67 (NEMA 6) CABLES: Robotic grade, oil resistant polyurethane jacket, PVC insulation

**WARNING:** Do not exceed power rating (Watt = Voltage x Amperage). Permanent damage to sensor will occur.

---

**SWITCH INSTALLATION**

Place switch bracket onto any one of the four tie rods that run the length of the extruded tube. Insert the switch with set screw and the word “Tolomatic” facing up and slide into the mating slot on the bracket. Position the bracket with the switch to the exact location desired, with the bracket tight to the surface of the extrusion, then lock the bracket securely into place by tightening the set screw with the Allen wrench provided. Then tighten the switch into the bracket with a small slotted screwdriver.

RSX Extreme Force, Hydraulic Class Electric Actuator

Selection Guidelines

1. **ESTABLISH MOTION PROFILE**
   Using the application stroke length, desired cycle time, loads and forces, establish the motion profile details including linear velocity and force in each of its segments.

2. **SELECT ACTUATOR SIZE AND SCREW TYPE**
   Based on the required velocities and forces, select an actuator size including the lead of the roller screw assembly.

3. **VERIFY CRITICAL SPEED OF THE SCREW**
   Verify that the application’s peak linear velocity does not exceed the critical speed value for the size and lead of the screw selected.

4. **VERIFY AXIAL BUCKLING STRENGTH OF THE SCREW**
   Verify that the peak force does not exceed the critical buckling force for the size of the screw selected.

5. **COMPARE APPLICATION’S PEAK PARAMETERS TO PEAK CAPACITY (PEAK REGION) OF SELECTED ACTUATOR**
   Calculate the application’s required peak force and peak velocity and compare to the graphs. The selection must satisfy the application’s peak requirements.

6. **CONSIDER LUBRICATION INTERVAL**
   Evaluate the recommended lubrication interval with respect to the application motion profile. See page RSX_7 for complete lubrication information.

7. **TEMPERATURE CONSIDERATIONS**
   If the application’s ambient temperature lies outside of the standard range (see page RSX_8), contact Tolomatic.

8. **SELECT A MOTOR-ACTUATOR CONFIGURATION**
   Select an inline or a reverse-parallel motor configuration.

9. **ESTABLISH TOTAL TORQUE REQUIREMENTS**
   Calculate total system inertia, the peak and the RMS torque required from the motor to overcome internal friction, external forces and accelerate/decelerate the load.

10. **SELECT A MOTOR**
    Use the obtained total torque value to select a motor and a reduction device (if required). Verify that the peak torque value is below the motor’s peak torque curve, and that the continuous torque value is below the motor’s continuous torque curve. Verify the minimum torque margin (15%). Verify the inertia match.

11. **SELECT OPTIONAL POSITION SENSORS**
    12 sensor choices include: reed, solid state PNP or NPN, all in normally open or normally closed, with flying leads or quick-disconnect couplers.

12. **SELECT ACTUATOR MOUNTING**
    Mounting options include: TRN trunnion mount, FFG front flange mount, MP2 mounting plates, PCD clevis mount.

13. **SELECT ROD END OPTIONS**
    Rod end options include: CLV clevis rod end.

The above guidelines are for reference only. Use Tolomatic online sizing software for best results.

Ordering

ACTUATOR
RSX 096 RN12 SM450 RP1 HT1 FFG CLV XR10 KK2 YM

OPTIONS

MODEL & MOUNTING
RSX Rod-Style Actuator

MOTOR MOUNTING
LMI In-line motor mount
RP1 1:1 ratio, reverse parallel motor mount
RP2 2:1 ratio, reverse parallel motor mount

ROD END
Externally threaded rod end is standard
CLV* Clevis Rod End
SR1* Imperial Thread
*Not available for RSX096P

ROD EXTENSION
XR _ _ _ _ Enter desired rod extension in millimeters
*NOTE: XR option does not increase the working stroke, only the length of the thrust rod.
*NOTE: Please consult Tolomatic if your application requires rod extension length greater than 100 mm (3.9 in).

STROKE LENGTH
SM _ _ Enter desired stroke length in millimeters
Minimum Stroke: 75mm (2.95 in)

STANDARD OR HIGH TORQUE
ST1* Standard Actuator
HT1** High Torque Option
*Only available with RP option on RSX096
**Use sizing software to determine if HT1 is required for torque and motor specifications

TRUNNION MOUNT
TRR* Trunnion mount
*NOTE: Trunnion mount is not available for field retrofit, contact Tolomatic for details
*Not available for RSX096P

SIZE
MAX. STROKE
080 890 820
096 800 725
096P 450 —
128 665 555

NOTE: XR option does not increase the working stroke, only the length of the thrust rod.

The Tolomatic Difference  Expect More From the Industry Leader:

**INNOVATIVE PRODUCTS**
Unique linear actuator solutions with Endurance Technology™ to solve your challenging application requirements.

**FAST DELIVERY**
The fastest delivery of catalog products... Built-to-order with configurable stroke lengths and flexible mounting options.

**ACTUATOR SIZING**
Online sizing that is easy to use, accurate and always up-to-date. Find a Tolomatic electric actuator to meet your requirements.

**YOUR MOTOR HERE**
Match your motor with compatible mounting plates that ship with any Tolomatic electric actuator.

**LIBRARY**
Easy to access CAD files available in the most popular formats to place directly into your assembly.

**TECHNICAL SUPPORT**
Extensive motion control knowledge: Expect prompt, courteous replies to any application and product questions from Tolomatic’s industry experts.
